CSU School Residency Requirements

In the interest of promoting timely graduation, a modification of the residency requirement at each Connecticut State University campus is proposed. This modification must be approved through appropriate governance procedures on a campus in order for it to take effect on that campus.

Proposal:

With approval of the chairperson of the major or minor department or appropriate dean (when the credits are not being applied to a major or minor), up to nine (9) credits of courses completed at other Connecticut State University campuses can be applied to the residency requirement at Central (Eastern, Southern, Western). No more than one course can be taken at another campus at a time. Students should receive the required approval prior to enrolling in the “sister” campus course.

Interpretation:

With appropriate approval:

9 of 45 credits required for residency at Central—including 9 in the major or minor

9 of the final 30 credits required for residency at Eastern—including 9 in the major

9 of 30 credits required for residency at Southern

9 of 30 credits required for residency at Western—including 9 in the major

can be completed by taking courses offered on another CSU campus on-ground or on-line.
