THOSE STILLS

A Reader Says They Are Absurd

To the Editor: The Courant

I have been thinking about the many suggestions for improvements in the town that are being made, and I have a few ideas of my own. In my opinion, the most important thing is to improve the schools. The children now attend schools that are overcrowded and in poor condition. I would like to see new, modern schools built, with better facilities for teaching and learning.

I also think that the public transport system needs improvement. The buses are often late and the roads are poorly maintained. This makes it difficult for people to get around.

Finally, I believe that the town needs to consider developing more parks and recreational areas. People need places to relax and enjoy nature.

Sincerely,

A Reader
